EXPLANATORY NOTES

Introduction

This publication contains results of a survey of the earnings and hours of employees, conducted in respect of the pay-period which included 11 May 1981. Preliminary results were published on 17 November 1981 in *Earnings and Hours of Employees, Distribution and Composition, Australia, May 1981 (Preliminary)* (6305.0). Earnings and hours surveys have been conducted in May each year since 1974. A copy of the questionnaire used in the survey is shown on pages 4 and 5.

2. It is not proposed to conduct a survey of this kind in May 1982. While it is currently expected that there will be a survey in May 1983, a different sampling framework will be employed which is likely to have an effect on the comparability of that survey with the 1981 and earlier surveys in the series.

Scope of the survey

3. All wage and salary earners were represented except:

- (a) members of the permanent defence forces,
- (b) employees in agriculture,
- (c) employees in private households employing staff,
- (d) waterside workers employed on a casual basis,
- (e) persons employed by private employers (other than hospitals) not subject to payroll tax,
- (f) employees on worker's compensation.

All hospitals, whether subject to payroll tax or not, were represented in the survey, but other exempt non-government bodies, such as religious and benevolent institutions, were excluded. At the time of the selection of the sample, payroll tax was payable by employers paying in wages and salaries more than \$150,000 a year in Queensland and the Northern Territory, more than \$96,600 a year in Victoria, more than \$72,000 a year in New South Wales, South Australia, Western Australia and the Australian Capital Territory, and more than \$60,000 a year in Tasmania. It should be noted that changes in payroll tax exemption levels may affect the comparability of survey results for different years.

Coverage

4. The survey covered stratified random samples of government departments and authorities, hospitals and private employers subject to payroll tax.

Survey design

5. The majority of employers selected were requested to supply relevant details, on separate questionnaires, for only a sample of their employees. Individual employees were randomly selected by the employers in accordance with instructions supplied by the ABS. Employers with fewer than 10 employees were required to complete a separate questionnaire for every employee.

6. Although the sample was not designed to provide estimates of numbers of employees, it is estimated that 2,713,000 male and 1,518,000 female employees were within the scope of the survey. These and other estimates of numbers of employees included in this publication should not be taken as measures of total employment in the categories indicated.

Reliability of estimates

7. Since the estimates in this publication are based on a sample, they may differ from the figures that would have been produced if the information had been obtained for all employees. One measure of the likely difference is given by the *standard error*, which indicates the extent to which an estimate might have varied by chance because only a sample of employers and employees was included in the survey. For further details on the reliability of the estimates see the Technical note.

Classification of industry and occupation

8. Industry is classified according to the *Australian Standard Industrial Classification* (ASIC) and occupation according to the *Classification and Classified List of Occupations, Revised June 1976*. The table on page 2 shows details of the ASIC industries used in the survey.

Interpretation of estimates of occupational earnings and hours

9. The descriptions of occupations published in Tables 21 and 22 adhere to those in the classification mentioned in paragraph 8. The descriptions in the classification were designed to cover the entire labour force and may not accurately reflect the restricted coverage of employees included in these tables. It should be remembered that Tables 21 and 22 relate only to *full-time, non-managerial employees*. All employers and self-employed persons are therefore excluded, as are managerial, executive, professional and higher supervisory staff. Also, employees of many small firms and some other employees were excluded from the survey. (See paragraph 3.) *Hence the averages shown should not be interpreted as representing the earnings and hours of all employed persons*. Where applicable, an occupation includes apprentices, trainees, etc. as well as persons fulfilling the requirements of the occupation, irrespective of their qualifications.

Comparability of results

10. Because of differences in scope and definitions, the results of the survey are not directly comparable with those of other surveys and series such as the October surveys *Earnings and Hours of Employees, Australia* (6304.0) and the quarterly series *Average Weekly Earnings, Australia* (6302.0). In the October surveys 'adults' include persons under 21 years of age who are paid at adult rates; in the May surveys such persons are included with others under 21 years of age. Details of scope, coverage, and definitions for the surveys mentioned above and also those conducted in earlier years are summarised in *Year Book Australia* (1301.0), the *Labour Report and Labour Statistics, Australia* (6101.0).

11. Estimates of average weekly earnings and average hourly earnings contained in this publication may not be strictly comparable with those of earlier surveys: the private sector sample is selected from payroll taxpayers, and increases in payroll tax exemption levels, particularly since 1976, have resulted in the exclusion of more of the smaller businesses, whose employees generally have slightly lower average earnings.

12. Every effort has been made to exclude from survey figures any effect of the National Wage Case increase awarded on 7 May 1981; however, some slight undetected influence of that increase may remain.

(b) Excludes defence forces. (c) Excludes agriculture and services to agriculture (sub-division 01 and 02) and private households employing staff (sub-division 94).

Definitions

13. *Specified pay-period* is the pay-period which included 11 May 1981. In general, where an establishment was closed down for part or the whole of that pay-period or operations were seriously curtailed by an industrial dispute, breakdown, fire, etc., the employer was asked to supply survey particulars for the previous normal pay-period.

14. *Employees* comprise male and female wage and salary earners (as defined in paragraph 3) who received pay for the specified pay-period.

15. *Private employees* are employees of private employers subject to payroll tax and employees of non-government hospitals not subject to payroll tax.

16. *Government employees* are civilian employees of Australian and State government departments, authorities and semi-government bodies, and of local government authorities.

17. *Full-time employees* are employees whose standard (or rostered) weekly hours of work (see paragraph 20) were at least 30 hours. Included are full-time employees who began or ceased work during the pay-period and full-time employees on paid annual leave, paid sick leave and paid holidays. Some employees (e.g. aircrews, teachers, university lecturers), although paid for a weekly attendance of less than 30 hours, were classified as full-time.

18. *Part-time employees* are those employees who ordinarily worked less than 30 hours a week. Employees on short-time who normally worked 30 hours or more a week were classified as full-time employees.

19. *Non-managerial employees* were defined to include minor supervisory employees, leading hands, clerical and office staff as well as ordinary wages employees. They exclude *managerial, executive, professional and higher supervisory staff*, generally defined as those employees (a) who were ineligible to receive payment for overtime, or (b) who, although subject to payment for overtime, were in charge of a significant number of employees in a separate establishment (or establishments). For some occupations in government employment, such as school teachers and nurses, there is no general payment for overtime. In these cases, managerial, etc. staff were determined according to the degree of supervision exercised or in relation to the pay structure of associated administrative employees.

20. *Standard (or rostered) weekly hours* refers to the number of hours constituting a full week's work for the specified pay-period.

21. *Weekly hours paid for* refers to the hours for which payment was made. It comprises *ordinary time hours* (see paragraph 22) and *overtime hours*, which are those in excess of ordinary time hours. For employees paid other than weekly, hours were converted to a weekly basis. For

employees who began or ceased work, or were absent without pay for any reason during the specified pay-period, only the hours actually paid for were included. Where agreed hours of work were less than award hours, hours were based on agreed hours. Weekly hours paid for were not reported for managerial, executive, professional and higher supervisory staff.

22. *Ordinary time hours* refers to award, standard or agreed hours of work. It includes stand-by or reporting time which are part of standard hours, and that part of paid annual leave, paid sick leave and long-service leave taken during the specified pay-period.

23. *Weekly earnings* refers to gross earnings before taxation and other deductions have been made. It comprises *overtime earnings*, which refers to payment for overtime hours as defined above, and *ordinary time earnings*, as defined in paragraphs 24 to 27. It includes one week's proportion of payments made other than on a weekly basis, e.g. salary paid fortnightly or monthly and paid annual or other leave taken during the specified pay-period. Pay in advance, retrospective pay and annual or periodic bonuses, etc. are excluded.

24. *Ordinary time earnings* refers to that part of weekly earnings which is attributable to *ordinary time hours*, as defined in paragraph 22. It comprises *payment by measured result*, *award or agreed base rate of pay* and *other earnings* (excluding overtime).

25. *Payment by measured result* refers to payment by incentive, piecework, task bonus, commission, etc.

26. *Award or agreed base rate of pay* refers to the award, etc. rate of pay for ordinary time hours paid for, and includes all allowances (other than overtime) specified in the award, etc.

27. *Other pay* refers to ordinary time earnings not included in payment by measured result nor in award or agreed base rate of pay described above. It includes attendance and good timekeeping bonuses, profit-sharing and any other forms of over-award, etc. pay.

28. *Median earnings* is the amount which divides the distribution into two equal groups, one having earnings above the median and the other having earnings below it. Medians were calculated from grouped data, linear interpolation being used within the class interval in which the median fell.

29. *Mean (or average) earnings* is the amount obtained by dividing the total earnings of a group (e.g. full-time employees) by the number of employees in the group.

30. *Capital cities and other areas*. The classification is based on the postcode of the employee's place of employment or base of operations as shown in item B of the survey questionnaire. Postcode boundaries in capital cities do not correspond exactly with those of Capital City Statistical Divisions used for some other statistical

series; however, postcode areas have been selected so that the correspondence is as close as possible. The postcodes used for capital cities are: Sydney 2000 to 2263, 2507, 2560 to 2574, 2740, 2749 to 2754, 2756 to 2763, 2765 to 2787; Melbourne 3000 to 3211, 3335 to 3337, 3427 to 3429, 3750 to 3815, 3910 to 3916, 3926 to 3944, 3976 to 3984; Brisbane 4000 to 4199, 4203 to 4223, 4270 to 4287, 4300 to 4305, 4340, 4346, 4381, 4500 to 4514, 4520 to 4521; Adelaide 5000 to 5199, 5341 to 5343, 5400, 5434 to 5440, 5573, 5600 to 5601, 5606, 5680 to 5749; Perth 6000 to 6199, 6201 to 6205, 6211, 6553 to 6558; Hobart 7000 to 7101, 7150 to 7152, 7170 to 7177, 7201, 7207, 7400 to 7407, 7450 to 7457; Canberra 2600 to 2617, 2902, 2903 and 2911. Other postcodes are allocated to 'other areas'.

NOTE: If during the specified period your operations ceased or were seriously curtailed due to an industrial dispute, breakdown, fire, etc., please supply information for the previous normal pay-period, and, in the **COMMENTS** section below, state the period.

| H. STANDARD HOURS | | Office use only | 38 |
|--|---------------|-----------------|-------|
| Standard or rostered hours (excluding overtime) which the employee would ordinarily be paid for in a full week. Where necessary estimate standard hours for managerial, executive, professional, etc. staff. | | Hours Minutes | |
| NOTE: Where necessary convert hours to a <u>WEEKLY</u> basis e.g. employees paid fortnightly or monthly, employees on shift cycles, etc. | | | 39-42 |
| I. WEEKLY HOURS PAID FOR in the pay-period which included 11 May 1981. Do not include hours worked which were not paid for in the pay-period. Details are not required for managerial, executive, professional, etc. staff. | | | |
| NOTE: Where necessary convert hours to a <u>weekly</u> basis e.g. employees paid fortnightly or monthly, employees on shift cycles, etc. | | | |
| 1. Overtime hours paid for i.e. hours in excess of award, standard or agreed hours. Do not convert to ordinary time equivalent (e.g., if 4 hours overtime were worked at time and a half, report 4 hours, not 6). Exclude standard hours paid for at penalty rates, e.g. shift hours (to be included in "ordinary-time hours" below). | Hours Minutes | | 43-46 |
| 2. Ordinary-time hours paid for i.e. award, standard or agreed hours. Do not convert standard hours paid for at penalty rates (e.g. shift hours) to their ordinary time equivalent. Exclude hours on stand-by or reporting time except where these are part of standard hours. Include any part of paid leave related to the specified pay-period. | | | 47-50 |
| TOTAL HOURS PAID FOR, ITEMS 1 AND 2 | | | 51-54 |

| J. GROSS EARNINGS for the pay-period which included 11 May 1981 (i.e. earnings before taxation and other deductions are made). | | | |
|--|---------------|--|-------|
| SPECIAL PAYMENTS i.e. payments made in this period but related to other pay-periods. | | | |
| 1. Pay in advance/retrospective pay. | Dollars Cents | | |
| Note: Exclude any payments for leave taken during the specified pay-period. (Show in Items 4 to 6, below) | | | 55-60 |
| 2. Periodic bonuses (include annual leave loading paid this pay) | | | |
| Note: Exclude bonuses relating directly to the specified pay-period. (Show in Items 4 to 6, below) | | | 61-66 |
| WEEKLY EARNINGS IN THIS PAY-PERIOD. Include one week's proportion of payments made other than on a weekly basis (e.g. salary paid fortnightly or monthly; paid annual and other leave taken during the specified pay-period; commissions, periodic payments under incentive or piecework, and any payments under profit-sharing schemes which are normally paid each pay-period). | | | |
| Note: For shift workers, convert details of shift cycles to a weekly basis. | | | |
| 3. Overtime pay (payment for hours in excess of award, standard or agreed hours). Exclude shift penalty payments for ordinary time hours (to be included in item 5 below). Include shift penalty payments for overtime hours. | | | 67-72 |
| 4. Payment by measured result e.g. piecework, production and task bonuses, commission (one week's proportion) and other earnings which vary according to measured performance. | | | 73-78 |
| 5. Award pay. If no award etc. applicable show base rate of pay for ordinary time hours. Include all allowances (dirt, height, tool, etc.), and penalty payments (e.g. shift loadings) specified in the award, etc. Exclude over-award pay and service increments not specified in the award, etc. (Show in Item 6) | | | 79-84 |
| 6. Over-award and other pay (e.g. attendance, good time-keeping, profit-sharing, etc.). Exclude payments in the form of a reimbursement for expenses incurred whilst carrying out the employer's business (e.g. payments from petty cash). | | | 85-90 |
| TOTAL EARNINGS, ITEMS 1 TO 6 | | | 91-97 |

TECHNICAL NOTE

Introduction

Since the estimates in this publication are based on information relating to a sample of employees, they are subject to sampling variability; that is, they may differ from the figures that would have been produced if the information had been obtained for all employees. This difference, called *sampling error*, should not be confused with inaccuracy that may occur because of imperfections in reporting by respondents; such inaccuracy is referred to as *non-sampling error*, and it may occur in any enumeration, whether it be a full count or only a sample. Efforts are made to reduce the non-sampling error by careful design of questionnaires and detailed checking of completed returns.

2. The sampling error associated with any estimate can be estimated from the sample results. One measure of sampling error is given by the *standard error*, which indicates the extent to which an estimate might have varied by chance because only a sample of employees was included. There are about two chances in three that a sample estimate will differ by less than one standard error from the figure that would have been produced if information had been obtained for all employees, and about nineteen chances in twenty that the difference will be less than two standard errors.

3. Another measure of the sampling error is the *relative standard error*, which is obtained by expressing the standard error as a percentage of the estimate. Both measures are used in the following discussion of the reliability of the estimates.

4. Generally, estimates with a relative standard error greater than 15 per cent have not been included in the tables in this publication. For occupations, estimates with a relative standard error greater than 7 per cent have not been shown. Estimates relating to overtime earnings and hours, payment by measured result, other pay and part-time employees have been published if the relative standard error is less than 20 per cent (or less than 30 per cent if the standard error is not greater than \$1.00 or 0.5 hours).

5. As it is not practicable to include the standard errors of all estimates in this publication, a graph and tables have been provided to give an indication of the magnitude of the standard errors. These relate to the following groups of tables:

Tables 6-14 (Distribution)

6. These distribution tables are based on estimates of numbers of persons in various ranges of earnings or hours. The graph on page 24 shows the decrease in the relative standard error for numbers of persons as the size of the estimate increases. An example of the use of the graph in relation to Table 7 is as follows: the estimate for the earnings range \$340.00 to \$360.00 for Victorian males is 5.8 per cent of the total number of male employees. This represents approximately 43,500 males. The upper curve on the graph shows that the relative standard error of this estimate is approximately 5.5 per cent, i.e. 2,400

persons. This means that there are about two chances in three that the figure which would have been produced if information had been obtained for all employees is within the range 41,100 to 45,900 (5.5 to 6.1 per cent of the total number) and about nineteen chances in twenty that this figure is between 38,700 and 48,300 (5.2 to 6.4 per cent of the total number). In Tables 6-14 it has been necessary to combine some ranges in order to avoid publishing estimates of less than 4,000 employees since relative standard errors of above 15 per cent are considered to be too high for most practical uses.

Tables 1-5, 15-20

7. Tables A and B on page 25 show relative standard errors for some estimates of average weekly overtime and total earnings. An example of the use of Table A is as follows: the estimated average total weekly earnings of full-time non-managerial males aged 21 years and over in the mining industry is shown in Table 17 as \$447.30. Table A shows the relative standard error of this estimate to be 0.8 per cent (or approximately \$3.60). This means that there are about two chances in three that a complete enumeration would have given a figure within the range \$443.70 to \$450.90 and about nineteen chances in twenty that the figure would be between \$440.10 and \$454.50.

8. The following notes give indications of sampling errors which are not covered directly by Tables A or B:

All employees and private sector full-time non-managerial employees. Relative standard errors are approximately the same as those in Tables A and B.

Components of earnings. Relative standard errors of estimates of average award pay are approximately the same as those for average total earnings in Tables A and B. Estimates of payments by measured result and other pay are approximately the same as those for overtime earnings shown in Tables A and B.

Average weekly hours paid for. Relative standard errors for average overtime hours are approximately the same as those shown in Tables A and B for overtime earnings. Sampling errors for average total hours and average ordinary time hours are approximately the same as those for average total earnings shown in Tables A and B.

Movements between years. Standard errors for estimates of changes (and percentage changes) in average weekly earnings and hours between 1980 and 1981 are approximately one and a half times the standard errors of the 1981 estimates. Note that the relative standard errors on Tables A and B should be converted to absolute standard errors to relate to movements.

Tables 21 and 22 (Occupations)

9. Details are not shown for occupations or occupation groups for which the sampling error for any of the published averages is greater than 7 per cent or the estimate of numbers of employees covered by the survey is less than 5,000.
